Thomas Bullock CE Primary Academy

Home Learning – Year 5 – 23rd April

In Maths this half term we are continuing work on Fractions, Decimals and Percentages. This will be with a mixed range of videos, PowerPoints and online activities.

Maths: Each day we will look at at least 3 different Maths challenges. The first will be timed, the second will be an arithmetic based set of questions and/or learning. The third will be the lesson and work to be completed that day.

Challenge 1: The first challenge is a 3 in 3. Can you answer 3 Maths Questions and time yourself by answering them in 3 minutes?

Challenge 2: Answer the arithmetic questions. First talk them through with an adult, how will you solve them? Why did you make that choice? What is the best method? Can you answer them in your head? How will you check them?

Challenge 3: Go through the Powerpoint. Following on from work before Easter, this teaches both place value and its equivalent fraction. There is not a separate question sheet there are questions integrated into the middle and final slides, for you to complete in a workbook. If you need a new one, call into the office and collect one. Answers are mostly integrated into the Powerpoint for you to follow today.
