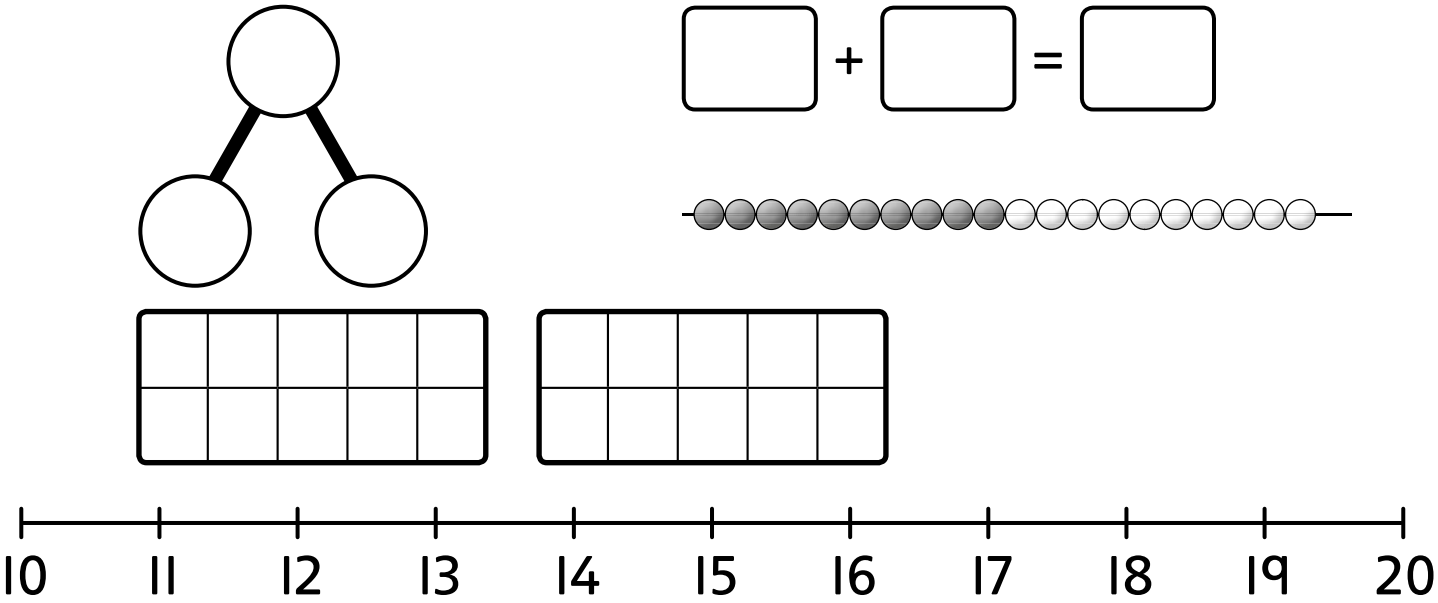
# Deepen Activities

**1** There are 15 . 5 more arrive.

**a)** How many are there now? Find the answer in different ways.



What is the same about the ways you tried?
What is different?
Which is most efficient?

**b)** Write a number story for your partner. Make sure they will need to count past 10 to solve it.

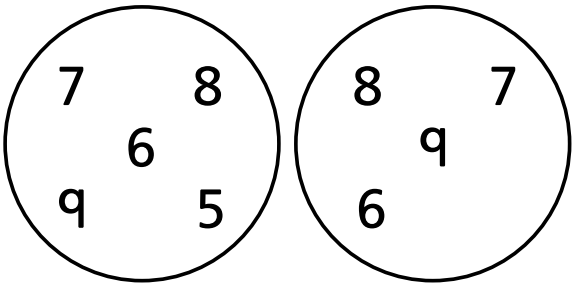
**2** Molly's counter is on 9. She rolls a dice once. What different numbers could her counter end up on?

| | | | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | FINISH 20 |

Now I will try starting on a different number!

**3** Choose a number from each circle. Add them together by making 10 first. What totals can you make?



Could I make the same total in more than one way?
