

Maths Weekly Overview – 20.4.2020

Each day there will be different activities posted on the website but feel free to do your own thing too!

Create bar graphs using data you have generated yourselves - maybe by rolling a dice 20 times and writing down which number appears each time, maybe by counting the number of each type of sweet in a packet of Haribos or maybe by messaging your family and friends and asking them to tell you their favourite fruit, breakfast cereal or chocolate bar!

Create line graphs by taking the temperature every hour during the day or if you have any seeds at home maybe you could plant some and measure the seedling as it grows - you will need lots of patience for this one!

On Friday I will set you 4 Purple Mash activities to have a go at if you'd like.

Don't forget to post pictures of your charts and graphs on dojo or the class blog...and if you're drawing a straight line remember to use a ruler!
