

Monday Maths Activities – Ratio and Proportion Problem Solving

Please watch the powerpoint video which you will find here:

<https://vimeo.com/419526763> Password: North America.

Then, take some time to go through all of the pages of this unit in power maths (pages 153 - 173). Have you got any gaps where you haven't finished the work on previous days? Have you marked all your work? Are there any bits that you need to look at again?

We have nearly finished this unit – this is the week to make sure for yourself that you understand the learning.

ONLY once you have done this, then please go on to today's work – pages 174-176 – *if you have time*.

Check your work once it's done – do you have any questions that you need to ask me, or is there anything you need help with?

There is a separate file with ALL of the answers for the lessons in this unit, so use this to check your work so far, and keep it for checking tomorrow's work too.
