

How to find today's maths lesson

Go to : <https://whiterosemaths.com/homelearning/year-6/>

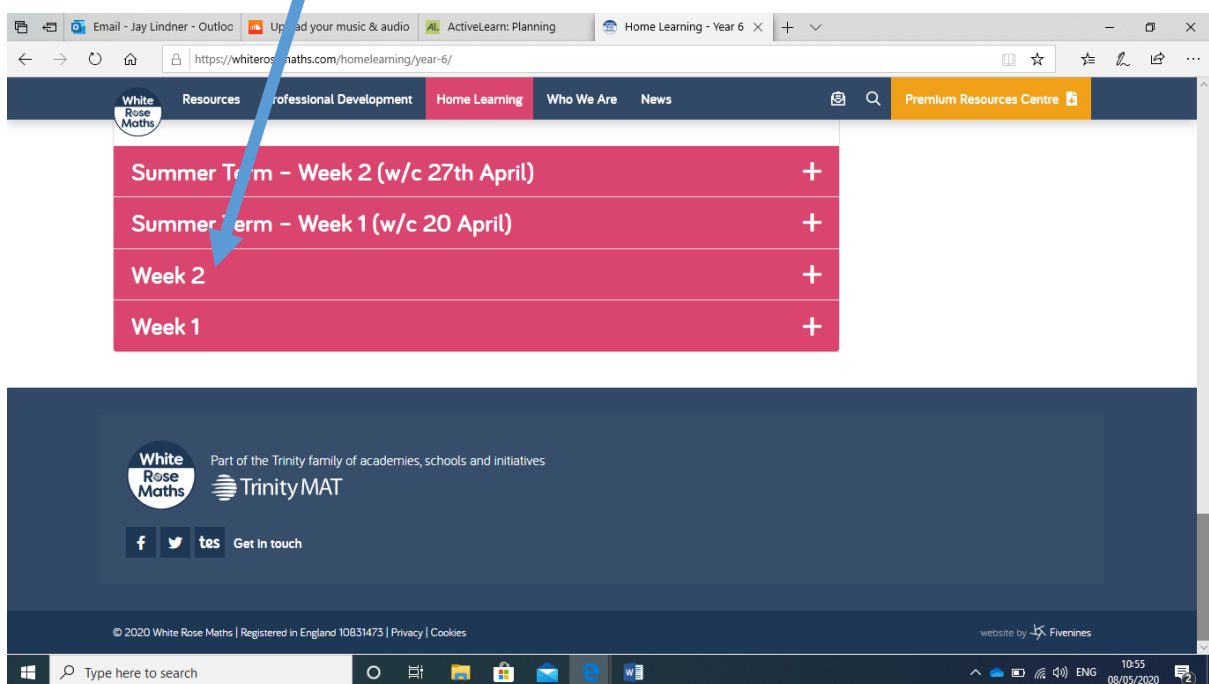

Today we are going to work from the White Rose Hub website again. We need Week 2 Lesson 2.

When you open the website, you'll see a page like this:

You need to **scroll down** using the scroll bar at the right of the page or your down arrow, or swipe down if you're on a tablet.

You need to look for **Week 2** at the bottom (not Summer term week 2):

Click it and then your page should look like this:

The screenshot shows the White Rose Maths website's 'Home Learning - Year 6' page. The top navigation bar includes links for Resources, Professional Development, Home Learning (active), Who We Are, and News. A search bar and a link to the Premium Resources Centre are also present. The main content area features a list of lessons for the Summer Term, with Lesson 1 - Calculating scale factors selected. A sidebar on the right provides navigation options, including Home Learning, Easter Fun, Summer Term, Home Learning - Early Years, and Home Learning - Year 1 through Year 6. The bottom of the page shows a Windows taskbar with the search bar and various application icons.

Scroll down again until you get to Lesson Two:

The screenshot shows the White Rose Maths website's 'Home Learning - Year 6' page, scrolled down to Lesson 2 - Ratio and proportion problems. The page features a video player for Lesson 2, a 'Get the Activity' button, and a 'Get the Answers' button. The sidebar on the right provides navigation options, including Home Learning - Year 10. The bottom of the page shows a Windows taskbar with the search bar and various application icons.

I would like you to watch the video for Lesson 2 and complete the activities in your exercise book (or on the sheets if you prefer). Check your work using the answer pages.
