Subtract whole numbers with more than 4 digits (column method)

Complete the subtractions.

a)

	7	3	1	5	
_	2	1	0	4	
	5	2		١	

c)

	7	² 3	۱1	5
_	5	4	2	0
	٦	8	9	5

b)

		7	3	¹ 1	5	
	_	3	2	4	1	
		4	0	7	4	

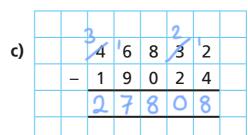

Complete the calculations.

a)

	8	4	3	4	
_	2	1	0		
	6	3	3	0	

b)

		£	8	8	2	0	0	
	_	£		6	1	0	0	
		E	8	2	1	0	0	

			2 1	h			
d)		3	4	5	2	0	
	_			6	7	9	
		3	3	8	4		

3 A family has £22,658 in the bank.

They spend £3,600 on a holiday.

How much money do they have left?

£19,058

It is 10,553 miles from London to Sydney.

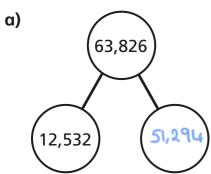

It is 9,929 miles from New York to Sydney.

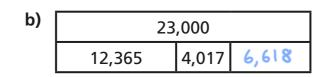

How much further away is Sydney from London than from New York?

624 miles

Complete the models.

6 Mr Hall has written these subtractions on the board.

68,945 - 34,758

Rosie's workings

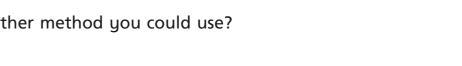

Whitney's workings

Explain the mistakes that Rosie and Whitney have made.

How did you work this out?

Is there another method you could use?

8 Teddy and Jack are playing a computer game.

Teddy scores 55,890 points.

Jack scores 36,475 points fewer than Teddy.

How many points does Jack score?

19,415

How many points do they have altogether?

75,305

9 Here are some digit cards.

5

8

9

Ron makes a 4-digit number with the cards.

Eva makes a 4-digit number with the cards.

The difference between their numbers is between 1,000 and 3,000 What numbers could Ron and Eva have made?
