

## Weekly Maths Overview - w/c 7.6.2020

This week we will be learning about angles - we will identify different types of angles and compare and order angles.

On **Monday, Tuesday and Wednesday** there is a PowerPoint to watch and then some questions to answer.

On **Thursday** there is a selection of questions to have a go at - you don't have to do all of them, just pick a few and see how you get on!

I think about half of the class is now logged onto **RMEasimaths** - you should be aiming to do about 30 minutes most days. The feedback we have received so far has been largely positive. If anyone is having trouble getting started please ask - I know there have been issues with running it on tablets and with the need for Flashdrive to be installed.

**Acute angle**  
Less than  $90^\circ$

**Right angle**  
Exactly  $90^\circ$

**Obtuse angle**  
More than  $90^\circ$   
Less than  $180^\circ$

**Reflex angle**  
More than  $180^\circ$   
Less than  $360^\circ$
