

Weekly Maths Overview - w/c 15.6.2020

This week we will be focusing on sorting and classifying triangles and quadrilaterals.

On Monday and Tuesday there is a PowerPoint to watch and some questions to have a go at. On Wednesday there is a PowerPoint to watch and then 3 different activities to choose from. On Thursday we will be carrying on with the challenge questions - as usual don't feel you need to do all of them!

There are a range of activities on Purple Mash related to shape and angles which you can have a go at too if you would like.

Well done to all of you who are now using RMEasimaths - some of you have already completed over 2 hours worth of activities! (You should aim to do about half an hour most days.)
