

## Science for w/c 7/6/2020

L. O. to classify and identify different types of teeth and their functions

Listed below are some suggested activities that you could have a go at. You are not expected to do all of them and if you have other ideas feel free to do them instead or as well!

This link gives you information about why you should clean your teeth:

- If you put pieces of egg shell in different liquids today is the day to carefully take them out and compare them - what do they look like now and why do you think this is?
- Think about all the different products available to keep our teeth clean - find out a bit more about some of them - what are they for, how often should we use them, what is in them?

- Write a set of step by step instructions explaining how to clean your teeth
- Create a cartoon strip comparing what happens when you lose a baby tooth to what happens when you lose an adult tooth
- Draw a poster advertising a new kind of toothpaste - how are you going to persuade people to buy your toothpaste? What makes it special?
