The Art Knowledge concepts we focus on in KS1 and KS2 are:

Line: An element of art defined by a point moving in space. Lines may be two-or three-dimensional, descriptive, implied, or abstract. This is the main foundation to art work.
Shape: An element of art that is two-dimensional, flat, or limited to height and width as well as the area taken up by an artwork.
Colour: An element of art made up of three properties: hue, value, and intensity. Colour will be taught in stages through key vocabulary such as: Hue: name of colour, Tone: hue's lightness and darkness (a colour's tone changes when white or black is added) and Intensity: quality of brightness and purity (high intensity= colour is strong and bright; low intensity= colour is faint and dull).
Tone: The lightness or darkness of shades or colours. White is the lightest tone; black is the darkest. The tone halfway between these extremes is called middle grey.
Form: An element of art that is three-dimensional and encloses volume; includes height, width and depth (as in a cube, a sphere, a pyramid, or a cylinder). Form may also be free flowing.
Texture: An element of art that refers to the way things feel, or look as if they might feel if touched.
Space: An element of art by which positive and negative areas are defined or a sense of depth is achieved in a work of art.
